EUPAN website: State of play
Current Situation

- The website has been realised thanks to the financial contribution of the French Presidency 2008.
- It does not comply with web standards anymore.
Conclusions:

- The EUPAN website is known to the representatives of the MS, but mostly occasionally used only.
- Mainly used is the public website. Intranet website restricted to accessing meeting materials and studies, as well as for admin purposes for EU presidency needs.
- Knowledge Centre is the most used section, followed by Information on the thematic areas, General Information about the network and Information on upcoming events.
EUPAN Website Questionnaire (2/2)

- The “Who’s Who” and the News sections are less frequently used due to outdated information and user-unfriendly navigation.

- Main purpose of the EUPAN website is accessing information developed within the network, followed by providing general information on the network and its members. Promoting the results of the work done by EUPAN and information on upcoming events were also deemed important.
What should be the future of the website?

- Keep the website (18/28)
- But: unfortunately not possible
Purpose of the Website

- Preparation for upcoming meetings
- Presentation of the network to the public i.e. virtual „business card“
- Documentation
2 Options

Simple, static webpage

- Compact, but nice webpage, containing a description and mission statement of the network and the contact details of the respective presidency.

Small webpage (incl. storage possibility)

- If EIPA can provide not only webspace (‘hosting’), but also a standard CMS (e.g. Typo3) it is easy for a presidency to add documents to the website.
Thank you for your attention!
